How to Build Speaker Enclosures 8th edition pages [Paperback] by Alexis Badmaieff This informative book on speaker building is primarily written to address the enclosures, but has valid information in regard to some Good designs that includes basic speaker information for Reviews: 9. Hardcore speaker hobbyists take delight in figuring all this out for themselves, designing and building the crossovers and enclosures from scratch to see what comes out. To make double sure that everything was sealed, we waited for the glue to dry and ran a bead of silicon caulk over all of the box's internal seals. We used a hand-held tube of caulk, since it would be tough to get a caulk gun down inside the box at this point. Let the caulk cure for hours before putting the subwoofer back in. Below are the steps necessary to build the subwoofer enclosure: Run a bead of carpenters glue along one edge. Do not install the part with the holes for the speakers yet. Note: For a more finished look (without gluing on veneers), some people will build speaker boxes with wood glue alone. This will work fine, but you will need some .
